# Datasym

# The complete solution for Retirement Living

## Datasym Menumark

Datasym's product suite offers Retirement Living a complete end to end solution from point of sale through to resident meal ordering. Our solution is designed to offer residents freedom to order their own food with multiple prices for residents and visitors, up to a week in advance using their own account allocated to their room.

The products are user friendly and can be tailored to the residents needs such as images for recipes and with the additional benefit of providing dietary/nutritional and allergen information.

The solution can interface with internal finance systems along with loyalty schemes and can produce automated billing at the end of the month for residents.

**Benefits:**
- Increased Resident Satisfaction
- Reduces Waste and Lowers Food Costs
- Promotes Nutrition and Allergen awareness and encourages informed menu choices
- Access to Feature-rich Reporting

# Major Functions, Benefits and Features

Datasym's solution offers the resident the ability to order food 7 days in advance via a central console. The resident also has the ability to cancel meals allowing more flexibility.

The products provide consistency of cost to ensure profit margin/ cost neutral is maintained.
