

# Datasy

## KDS, the perfect replacement for the traditional kitchen printer

### Datasy KDS

Datasy KDS is a replacement for a traditional kitchen printer or to be used to control orders coming in from third party delivery services. The KDS is run as a web service and can be used on any O/S.

**There are 3 areas of KDS**

#### **Kitchen Prep Screen**

A touch screen is located to prepare orders and mark for collection.

#### **Customer Facing Screen**

Customer screen showing order number and progress.

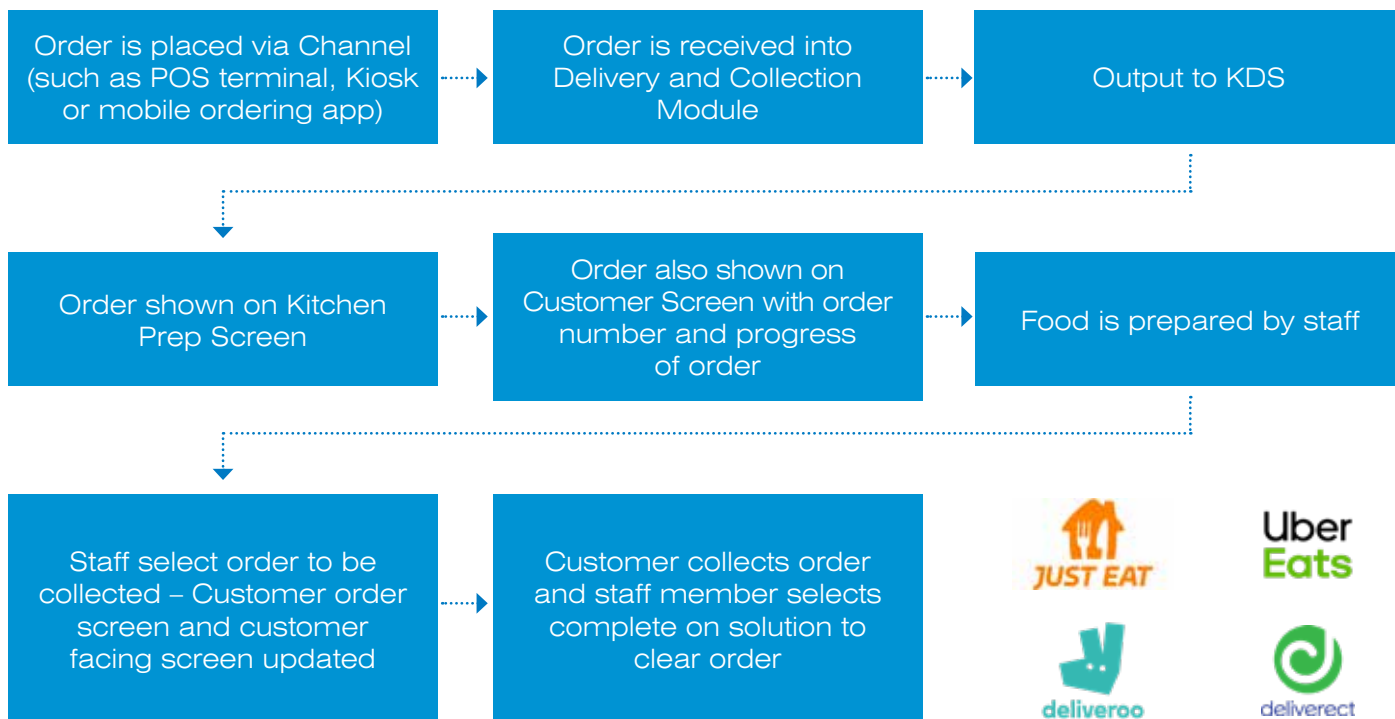

#### **Collection Screen**

A touch screen or tablet to clear off orders once collected.

# Datasym KDS

The KDS solution has ordering channels clearly marked to show if order has been received via POS, Table Ordering, Kiosk or food ordering app such as Uber Eats, Just Eat, Deliveroo, Deliverect etc.

The KDS has a traffic light system based on the time the order is being prepared; highlighting overdue orders in Red, in progress in Amber or order received in Green allowing staff to keep on top of their priorities.

## Benefits of Datasym KDS

- Intuitive user interface
- Clear visibility of order channels such as Uber Eats, Just Eat, Deliveroo & Deliverect etc.
- Web based solution – not hardware or platform dependant
- Displays preparation and ready for collection on screen for waiting customers and drivers
- Traffic lights assist staff members with priorities and waiting times
- Custom order notes clearly displayed
- Option to use separate collection screen to mark as collected
- No need for noisy kitchen printer
- No printer roll costs
- Avoids losing kitchen print outs
- Quick & efficient
- Ability to handle and display multiple order channels
- Professional solution

Solution is available on a monthly SAAS option per month per screen per site. Hardware is additional. If you have any questions or want to know more please contact us.
